What changed vs prior version

Suite 010 status: pending → active; monthly rent +\$225 (from \$11,050 to \$11,275).

Certified roll date advanced from 2026-08-31 to 2026-09-01; total units and areas unchanged.

Initial sizing rate increased from 6.75% to 7.50% (75 bps); capitalization rate increased from 7.50% to 7.75% (25 bps).

Effects: GPR +\$2,700 annually; EGI +\$2,565; management fee +\$77; NOI before reserves +\$2,488; NCF +\$2,488; higher cap rate reduces value by about \$415k; higher sizing rate reduces DSCR-based loan sizing; binding LTV constraint declines with value, reducing maximum loan by about \$250k; net cash out decreases accordingly.

Risks and missing diligence (updated)

Pending-in-occupancy inclusion risk: still present in manager headline logic, but no pending units on the revised roll; occupancy now 10 active, 2 vacant.

Near-term rollover risk: present (Suite 001 expiry within 12 months).

All other risk conclusions unchanged from prior version.

Risk	Assessment	Note
Pending counted as occupied?	Present	Cover note logic persists though no current pending unit
Near-term rollover (<12 months)	Present	Suite 001 expires 2027-02-28
Missing insurance	Absent	Policy declaration provided
Capital booked in opex	Absent	Roof replacement booked as capital
Unsigned rent change	Absent	No unsigned proposal affecting rent
Temporary free rent	Absent	None indicated
Sizing floor binding	Absent	Note rate > floor
Refinance shortfall	Absent	Net cash out remains positive

Source notes (revised)
